

## 1. Overview

Common Library Android SDK Version 1.1.0.0 is released.

With using this driver, printing via printers made by Nippon Primex Inc. with USB or Bluetooth transmission from Android.

## 2. Provided disk and its overview

For this version, the following functions are provided.

[Sample App Installer]

- NEISample\_20140218.apk

Please conduct this function after transmitting this file to Android terminal.

[SDK itself]

- The following 3 files; NPrinterLib.jar、core.jar、javase.jar

These are jar files which are installed when customers make app.

[Manual (document) Folder]

- Document

Manual and Sample source for Android applications

Please be sure to read it in advance for taking advantage of this SDK and using it correctly.

## 3. Special instruction

The function [NPrinterInf] has been changed for upgrading from 1.0.0.0 to 1.1.0.0.

Please delete old [NPrintInf] manually before installing 1.1.0.0 if 1.0.0.0 has already been installed.

\*The storage place of NPrintInf depends on models of Android terminal.

Please refer to [About Internal Storage / About setting file (page5 ~ page6)] for details.

## [Revision History]

---

### ■Version

1.0.0.0

### ■Date

2013/05/31

### ■Revision contents

- New development (only USB)  
Function version  
Sample application: 1.0.0.0  
Common library: 1.0.0.0

### ■Representative

Nippon Printer engineering Inc.

---

### ■Version

1.1.0.0

### ■Date

2014/02/18

### ■Revision contents

- Applying to Bluetooth connection
